

Site Engineer

Logistics / Warehousing

Dragomiresti, Ilfov

Our client is a major international player in the field of warehousing, transport, and co-packing, in Dragomiresti – Ilfov. On its behalf, we are looking for a **Site Engineer**, a recognized expert, ready to contribute to the achievement of this new facility.

S/he will ensure the successful roll-out of the whole operation of building the logistic platform, since the phase of tendering to the completion of works, the follow-up, and the final acceptance by the beneficiary. A successful assignment will fully respect safety rules, building code, urban planning code, internal rules, business processes, operating methods, quality and values of the Client and the local environmental norms.

Responsibilities:

- Coordinating the work of contractors;
- Scheduling the different construction stages; monitoring the progress according to the construction schedule, alerting on possible deviations and preventing delays;
- Representing the company's interests during negotiations with contractors; acting as the company representative on the construction site; controlling work quantities and searching for new contractors;
- Organizing works on site;
- Checking the conformity of works with the specifications and plans;
- Conducting the weekly construction meetings and reporting about them to the project manager;
- Being familiar with the construction permit regulations and the administrative storage license;
- Informing proactively the project manager of all the problems on the construction site;
- Ensuring safety and quality control;
- Maintaining in order all the necessary administrative documents on site;
- Supervising the proper application of internal and legal safety and quality control regulations and policies, applicable to all employees and subcontractors on site;
- Monitoring the delivery of the acceptance process;
- Ensuring the delivery of the acceptance process with minimum amount of remarks;
- Monitoring, reporting and informing the project manager about all deviations or issues, according to the group construction standards and implementing any preventive and corrective action plans.

Desired experience & skills:

- Construction engineer – civil works and similar;
- English – fluent;
- Similar experience – industrial projects in construction field;
- Project Management capabilities / Microsoft Project use;
- Multitasking and hands on, adaptable, autonomous, well organized, versatile, rigorous and quality oriented;
- Good communicator, pro-active cooperation, results through performance.
